

BMP Summary Sheet

Department Name:

Category of Municipal Operations: Parks and Open Space Maintenance

BMP Title:	Outdoor Storage of Raw Materials
BMP Description:	<ul style="list-style-type: none">• Store all materials inside. If this is not feasible, then all outside storage areas should be covered with a roof and enclosed to prevent storm water contact.• Cover and contain stockpiles of raw materials while not in use to prevent storm water from running into the covered piles.• If stockpiles are too large to be covered and contained, implement erosion control practices at the perimeter of the site.• Keep liquids in a designated area on a paved impervious surface with secondary containment.• Keep outdoor storage containers in good condition, and in a clean and dry area.• Secure drums stored in an area to prevent accidental spillage or stealing.• Cover wood treated with chromated copper arsenate, ammoniacal copper zinc arsenate, creosote, or pentachlorophenol with tarps store indoors.• Store chemicals, drums, or bagged materials in secondary containers if applicable.• Release accumulated stormwater in petroleum storage areas prior to the next storm. Water should at least pass through an oil/water separator and, if allowed, discharged to a sanitary sewer.
